HANDOUT · WORKSHEET FOR TEACHERS

# Adapting assessment to GenAI

Work through the steps for your own course. Write in the boxes.

Course: _____

## EXERCISE 1 Map your assessment

Steps 1 to 3

**1** Which ILOs do you have, and which assessment forms correspond to them?

| ILO | Assessment forms (or part of a form) | Lane 1 | Lane 2 |
|---|---|---|---|
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |
| | | ☐ | ☐ |

**2** In which lane does each assessment form belong? Tick it in the table. If a form has parts in both lanes, split it into two parts and give each part its own row.

**3** Is any ILO assessed only in Lane 1, or only in Lane 2? If so, is that a problem?

## EXERCISE 2 Rethink one ILO

Steps 4 to 8

**4** Do you have concerns that an ILO is not always achieved, or can no longer be verified, because of GenAI use?

☐ No: go to step 7 ☐ Yes: pick one ILO and continue. Which? _____

**5** What evidence would convince you that a student has achieved it? Does this fit best with Lane 1 or Lane 2 assessment?

☐ Lane 1 ☐ Lane 2 ☐ A combination of both

**6** What does the learning process towards the ILO look like? Which paths could students take to achieve it? Would it be fitting to assess this process as a measure of the ILO?

Assess the process? ☐ Yes ☐ Partly ☐ No

**7** Could GenAI interfere with the learning process (take over intrinsic load) or support it (remove extraneous load)? Which use of AI, if any, fits while students learn?

**GenAI could interfere by**

**GenAI could support by**

**8** What type of formative assessment, or Lane 2 assessment-as-learning, could you put in place to better guide the process towards the ILO?

**9** Taken together, can you ideate a novel Lane 1 or Lane 2 assessment? You can also think of a combination of both.

☐ Lane 1 ☐ Lane 2 ☐ Combination

**9.1 What would the student be tasked to do?**

**9.2 Which grading criteria, and how valid are they as measures of the ILO?**

**9.3 How would you guide the learning process?**

**9.4 Which GenAI use, if any, is responsible during learning and/or the assessed performance?**

**9.5 Is this assignment feasible at face value? Estimate the marking time, then check your estimate with a colleague.**

Marking time per student _____ min × students _____ = total _____ hours

**Pitch in one sentence**
